SAMEER NAGAR

San Jose, CA | +1 (657) 751-9425 | nagarsam8989@gmail.com | GitHub | LinkedIn | Portfolio

Software Engineer | Java, Spring Boot, Python, React, TypeScript | AWS, Kafka, Microservices, PostgreSQL

SUMMARY

Full-stack software engineer with 3+ years shipping production backend services and web applications. Builds Spring Boot and Python microservices on AWS with Kafka event streaming, REST APIs, and PostgreSQL/MySQL data layers, and the React and TypeScript front ends on top of them. Owns work end to end — design, implementation, testing, CI/CD release, and production support against 99.9% uptime SLAs. M.S. in Computer Science; experienced working directly with clients and product stakeholders.

WORK EXPERIENCE

Saayam For All — GenAI Lead & Full Stack Engineer, San Jose, CA *July 2026 – Present*

- Built and deployed 5 Spring Boot 3 / JDK 17 microservices with Kafka event streaming on AWS EKS, covering volunteer, request, analytics, and AI domains.
- Developed React and React Native applications backed by REST APIs, PostgreSQL/Aurora data models, and AWS services (Lambda, API Gateway, Cognito, S3).
- Established CI/CD pipelines, automated unit and integration testing, and monitoring and alerting across services.
- Lead technical direction — architecture decisions, sprint planning, code review, and mentoring engineers through system design and debugging.
- Built LLM and RAG features with vector search, retrieval tuning, evaluation frameworks, and production guardrails.

Unthinkable Solutions — Software Engineer, Gurugram, India *Nov 2021 – May 2024*

- Delivered 15+ production REST APIs and full-stack features for client-facing enterprise products, owning design through release.
- Architected event-driven data pipelines and optimized MySQL and MongoDB data models, improving processing efficiency 22% and query speed 35%.
- Owned production reliability — log analysis, incident triage, root-cause investigation, and hotfixes — sustaining 99.9% uptime under SLA.
- Implemented automation and orchestration across operational workflows, reducing manual effort 40%.
- Worked directly with clients and product stakeholders to translate business requirements into delivered technical solutions.

Big Book Analytics — AI Engineer Intern, Fullerton, CA *July 2026 – Aug 2026*

- Evaluated 4 financial platforms for API extensibility and integration coverage; built a prototype integration layer improving data-interchange efficiency 20% and published the report and open-source codebase.

California State University, Fullerton — Teaching Associate *Aug 2025 – May 2026*

- Led technical instruction for 100+ CS students across advanced systems coursework; mentored on algorithm design, debugging, and system troubleshooting.

SELECTED PROJECT

AI Workflow Skill Builder — **1st Place, Agentic Dev Tools Hackathon**, San Francisco *June 2026*

- Co-built a native macOS app (Python, TypeScript, Swift, Rust, Vertex AI, SQLite) that captures desktop activity and converts it into reusable, executable automation workflows.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, Go, C++, C, SQL, Bash
- **Backend:** Spring Boot 3, JDK 17, Node.js, Flask, REST APIs, microservices, Kafka / AWS MSK, event-driven architecture, distributed systems, system design
- **Frontend:** React, React Native, TypeScript, HTML/CSS, responsive UI development
- **Cloud & DevOps:** AWS (EKS, Lambda, API Gateway, Cognito, S3, MSK), Docker, Kubernetes, CI/CD, Git, Linux, monitoring and alerting
- **Data:** PostgreSQL, Aurora, MySQL, MongoDB, SQLite, data modeling, query optimization
- **AI/ML:** LLMs, RAG, embeddings and vector search, prompt engineering, AI agents, evaluation frameworks, Gemini / Vertex AI
- **Certifications:** 5x Salesforce Certified — Administrator, Advanced Administrator, Platform Developer I, Platform Developer II, Agentforce

EDUCATION

M.S. Computer Science — California State University, Fullerton | GPA 3.70/4.00 *Aug 2024 – May 2026*

B.Tech. Computer Science — Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal, India | GPA 3.66/4.00 *Aug 2018 – May 2022*
